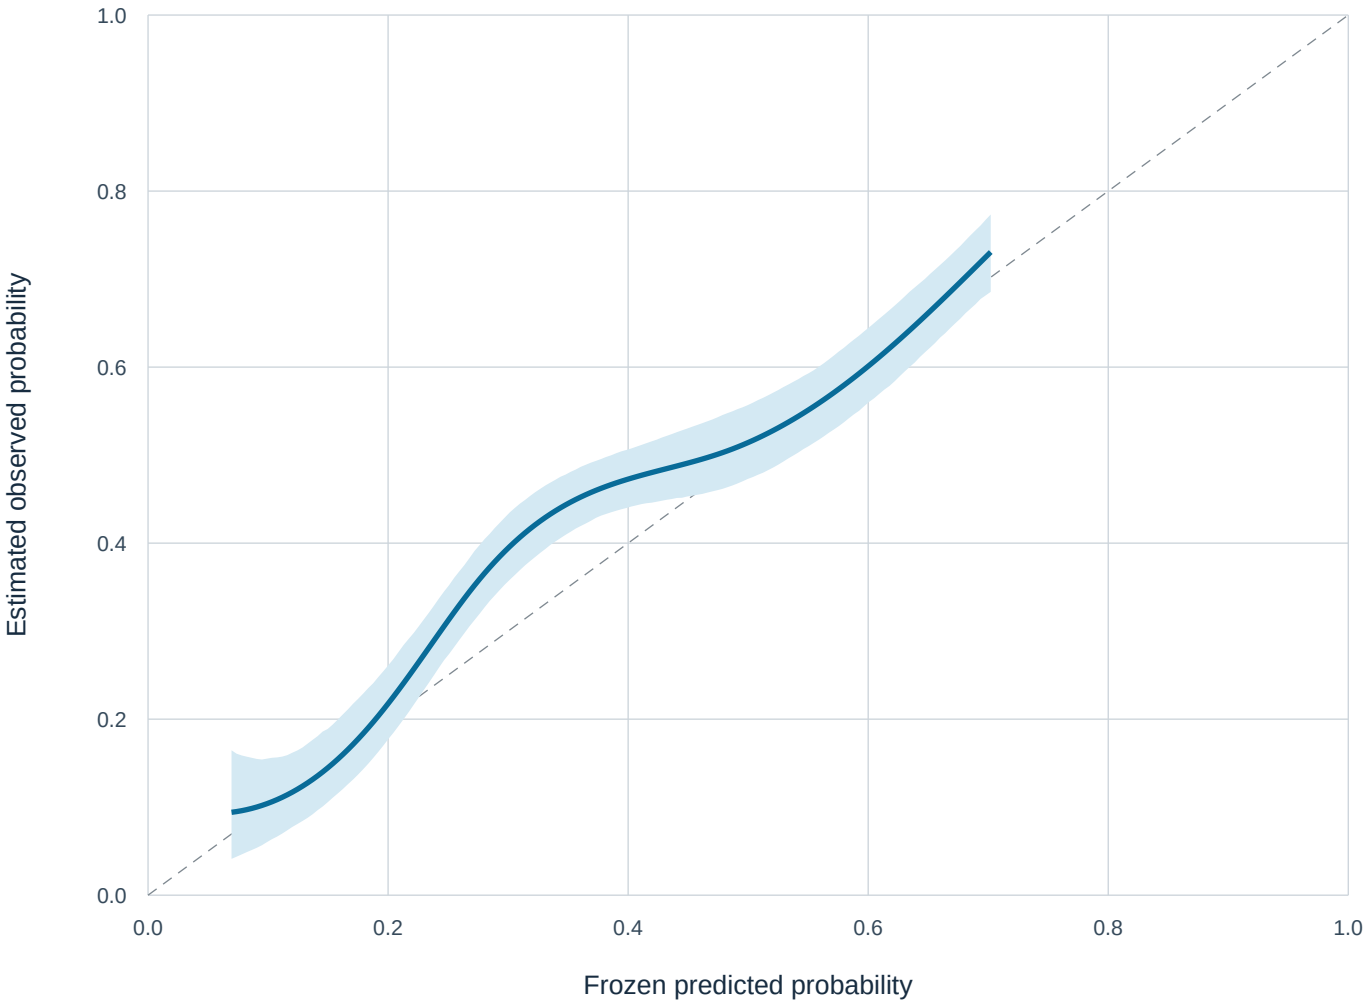
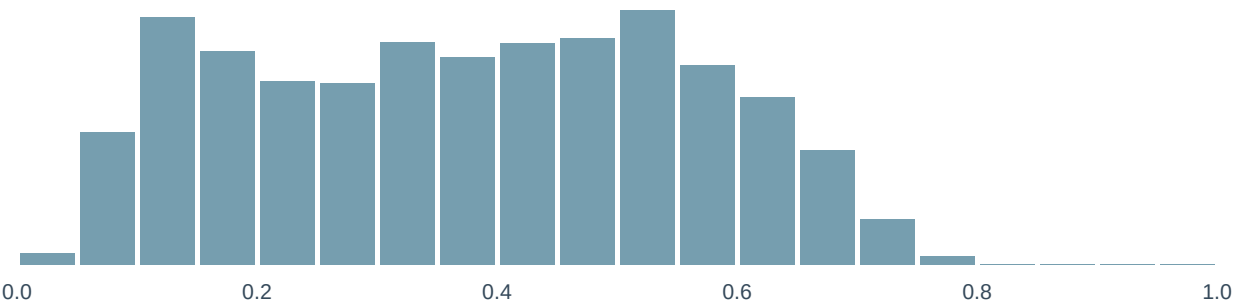
Survey-weighted calibration

Day 1 primary

NHANES 2015-2018 | n = 3,894 | original outcome labels



Weighted distribution of frozen predictions



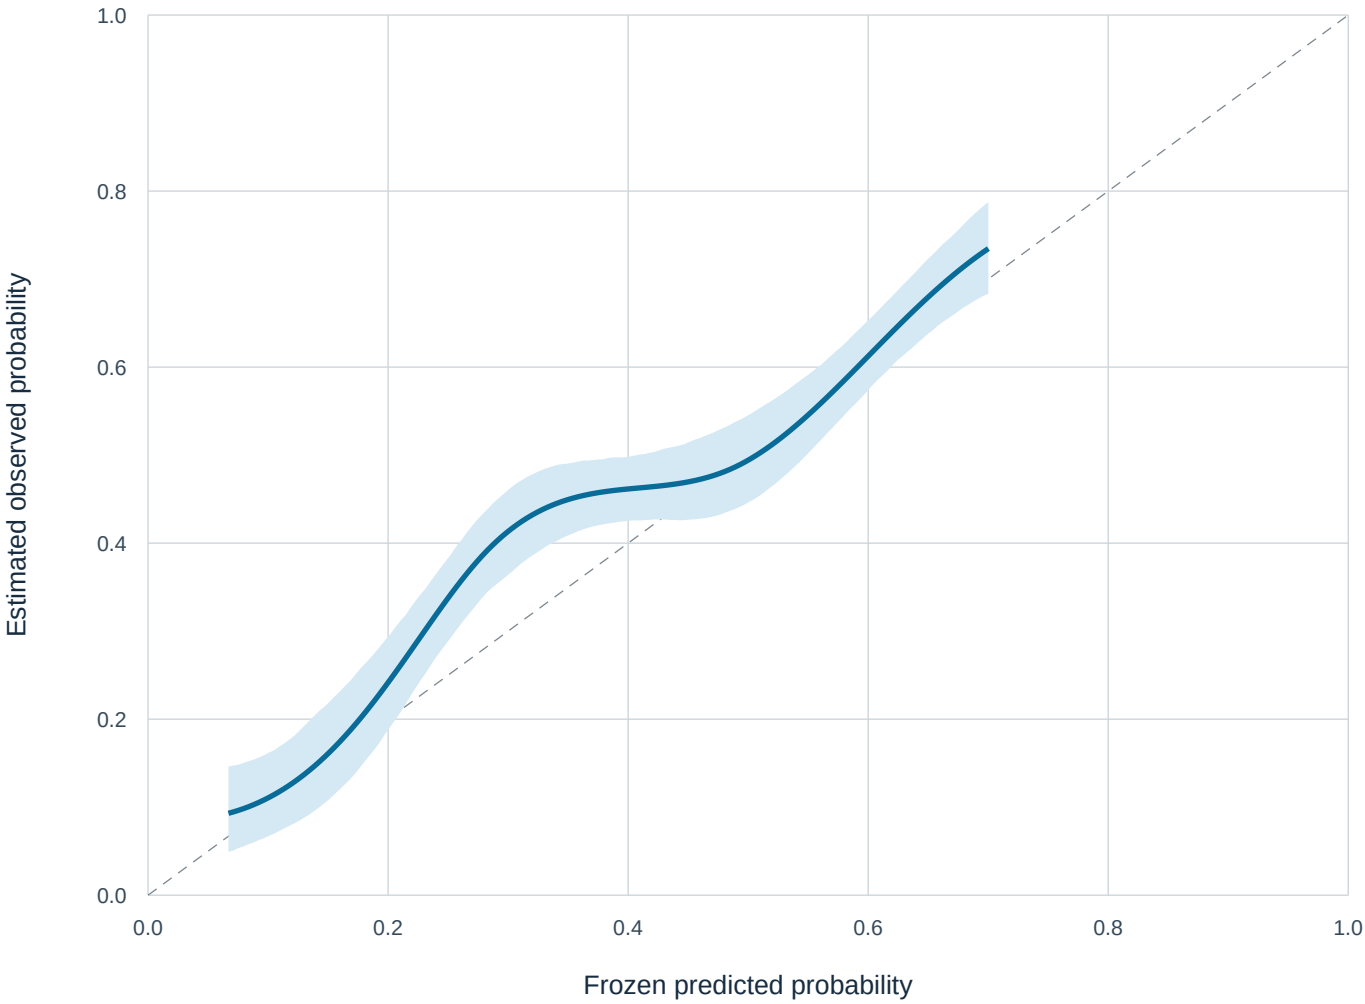
Each bar shows a survey-weighted probability mass; bins have width 0.05.

Blue: weighted logistic cubic B-spline; pale blue: pointwise 95% PSU bootstrap band.
Valid replicates: 2000/2,000. Dashed diagonal: ideal calibration.
Curve shown over the 2nd-98th weighted percentiles; full histogram shown below.
Diagnostic fitted using temporal outcomes. No frozen model probabilities were updated.
Bands condition on fixed predictions, original labels and fixed smoothing specification.

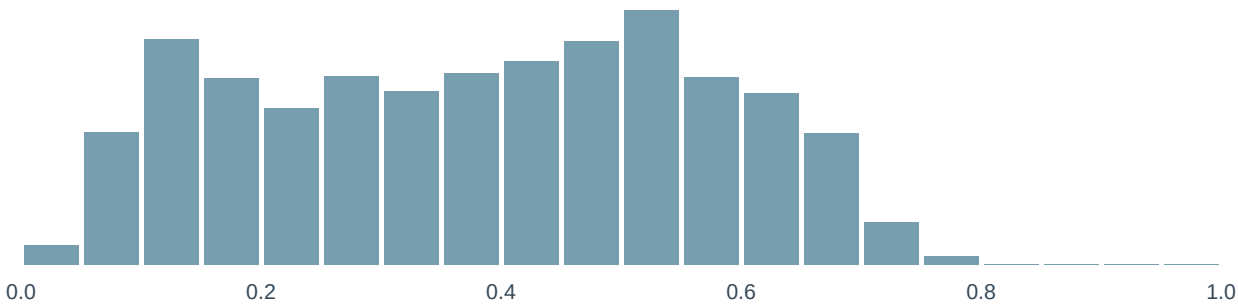
Survey-weighted calibration

Two-day sensitivity view

NHANES 2015-2018 | n = 3,381 | original outcome labels



Weighted distribution of frozen predictions



Each bar shows a survey-weighted probability mass; bins have width 0.05.

Blue: weighted logistic cubic B-spline; pale blue: pointwise 95% PSU bootstrap band.
Valid replicates: 2000/2,000. Dashed diagonal: ideal calibration.
Curve shown over the 2nd-98th weighted percentiles; full histogram shown below.
Diagnostic fitted using temporal outcomes. No frozen model probabilities were updated.
Bands condition on fixed predictions, original labels and fixed smoothing specification.
